

Quality, Health & Safety and Environmental Policy

Silgan Closures, member of Silgan Holdings Inc., is a global leading supplier of metal, plastic and composite closures for the food and beverages industry.

We provide our customers with best quality products and services responding to the needs of the marketplace. Our integrated management system is in compliance with ISO 9001, ISO 14001 and BRC Global Standard for Packaging and Packaging Materials.

We see it as our obligation to produce safe and legally compliant products to the specified quality. In addition our product development, as well as change management, follow a controlled (stage gate) process to ensure meeting customer expectations.

Continuously we are improving our products, processes and systems. We commit ourselves to Quick Response Continuous Improvement, with focus on containment, root cause definition, elimination as well as lessons learned. Lean management techniques represent the backbone for a steady increase of our overall efficiency.

We promote and reward excellence in the performance of our people. We utilize our resources to provide a safe and environmentally responsible workplace.

Health & Safety in our daily work come first. We believe that each accident to be preventable. No task is so important that a person's health and safety is put at risk. Therefore, we are committed to the motto "safety is no accident". We communicate and evaluate every health and safety incident and risk to prevent reoccurrence.

Moreover, we ensure environmentally responsible behavior by conducting operations in compliance with applicable law and all other regulations and obligations. We care about the ecosystem and therefore we prevent its pollution through proper management and treatment of waste and other hazardous substances. We are working on the continual improvement of our environmental management system to enhance environmental performance. In order to contribute to the protection of the environment, we commit ourselves to sustainable resource use and for this purpose, an environmental program for the reduction of energy, waste and solvent consumption, was implemented.
