one

Rely on strength: Silgan Closures.

Need to close something? Silgan White Cap invented it – safe; reliable; efficient. More than 80 years ago we first took the market by storm with our trailblazing pioneering achievement: a completely new metal closure for jars – the original! – that provided the basis for our success.

Today, we are a leading global supplier of closure systems made of metal or plastic for food and beverages packed in glass and plastic containers.

Our strength is the result of continuously developing our skills in this market. Silgan Closures reflects the high-quality, all-embracing range of products with which we provide solutions for our customers that are tailored to their needs: ranging from metal, and composite to patented and innovative plastic closures.

Rely on strength, international presence and skill. Trust Silgan Closures.

for all.

Wide-ranging services. One contact.

Strictly in accordance with European quality standards, Silgan produces top quality closures – innovative, environmentally compatible and sustainable – at production sites throughout Europe, Asia, and North and South America for manufacturers of foods and beverages worldwide. With our membership of SEDEX* and Ecovadis we are committed to ethical and social behaviour along all supply chains.

Our global strength and presence enables customers to benefit from the highest levels of service. Silgan Closures stands for reliability in delivery, with short distances and smooth communication processes, thanks – among other things – to native speakers.

Another key advantage: you will be assigned a contact that will always be there for you.

No matter what you have on your mind. No matter how urgent it is. No matter whether you require metal, composite or plastic closures or wish to use the advantages of our wider offering.

Make use of Silgan Closures' complete range of services: from closure, and sealing machines and auxiliary equipment to perfect customer and marketing support.

Metal Close

Closures.

Be assured of variety: Twist-Off® & PT.
Variants, diameters, shapes.

Experience the original: Twist-Off® and PT closures from Silgan Closures. We offer a comprehensive range of products for numerous applications – with a wide variety of shapes and in diameters ranging from 27 to 100 mm. All Twist-Off® and PT closures (ø 40, 51, 54, 60, 63, 70mm) are designed to meet changing market demands and consumer habits – especially

for oxygen-sensitive, vacuum-packed, and aseptically vacuum-packed foods and beverages. The filling is always perfectly protected, with no effect on taste and without loss of quality.

As all closures in every Silgan Closures' European factory are produced in accordance with uniform identical standards,

optimally coordinated materials are employed everywhere. This provides a dependable quality and a performance that remains constant. Our whole production capacity can be geared to your individual demands in the best possible way. You benefit from punctual deliveries and can react more effectively to seasonal peaks or orders from retailers at short notice.

FOR

FOR

Metal Closures – a permanently available material

Metal closures not only take good care of the environment in the way they are manufactured and used; they also contribute to ensuring that the products they contain have as little impact on the environment as possible.

By using metal packaging, product waste from spoilage or expired best-before dates can be avoided. Packaging materials and closures made of metal give their contents a one hundred percent protection from light, air and harmful external influences.

This increases shelf-life in a way that consumers really can consume their food exactly when they want to.

- coordination of the production line layout

Plastic
Clos

Safe and versatile: plastic closures. For a wide variety of container materials.

Always the first choice for mineral waters, juices, isotonic beverages, teas, fresh milk, and dairy products – plastic closures from Silgan Closures. We produce innovations for renowned customers in more than 50 countries across the world. Liquid cardboard and plastic sports drinks bottles are among those sealed with our closures, which are always safe and user-friendly for the consumer.

Whether hot, cold fill or aseptic, our excellent closures are tamper-proof, preserve product quality and are effortlessly resealable. Our range includes Plasti-Twist® in

various types – e.g. mono-material with liners, pads and induction heat seals for liquid foods and non-carbonated beverages – along with sports caps, carton closures and HOD water closures.

Our plastic closures are constantly being optimised to suit ever-changing markets, quality requirements, and consumer needs. Their materials meet the strictest European food laws and are suitable for international usage. Benefit from our experts' experience and know-how resulting from years of research, development, and practical application.

New packaging – new design solutions.

Plasti-Twist® and flat closures

Our range of closures was specially developed for today's market and with particular attention to efficiency on the filling line and a responsible use of materials. All products are manufactured under hygienic conditions and made only from high levelled approved materials.

The sports cap is our latest development and meets all the demands of an on-the-go consumption. Fitting the plastic cap after filling is particularly easy, while handling is extremely convenient for the consumer. This well thought-out high quality system offers added value to brands, enabling them to stand out from the competition.

Snap caps for HOD water bottles

In manufacturing Silgan Closures relies on the well-tested snap-cap technology to ensure enhanced safety and protection for all water containers. Our latest innovation is the K-seal cap, specially developed for the varying non-spill HOD water bottle market.

Innov

Carton fitments

The broad closure portfolio in different dimensions and functions is ed for gable-top cartons as well as aseptic cartons, guarantees high process stability, freshness and safety at all times.

Silgan

Gr

up.

Global, all-round success. Why top brands trust Silgan.

Metal packaging

As the largest supplier of food packaging in North America we work with America's most renowned brands.

Plastic packaging

Technical expertise and competence help produce plastic containers that keep their shape and suit markets including food, health, personal care and household.

Plastic containers for food

As the leading supplier of high-barrier plastic containers, we work with globally renowned brands to provide packaging solutions for non-perishable foods. Our sterilisable containers offer the lightness of microwave packaging – either in double fold or heat-sealed versions.

Metal packaging Europe

In Europe the Silgan brand stands for complete solutions in metal packaging.

Equipment

We supply our customers with the equipment, spare parts and service that the best possible round-the-clock efficiency requires.

Silgan Dispensing Systems

The business operates manufacturing facilities in the United States, Mexico, Brazil, Spain, Germany, Italy and China
